

Our Mission

The mission of the Clinton River Watershed Council is to protect, enhance and celebrate the Clinton River, its watershed, and Lake St. Clair.

Our Vision for the Clinton River

Individual and community actions protect and improve the health of the Clinton River, assuring that its natural, economic, and recreational value enhances the quality of life of those who live, work, and play in the Clinton River watershed and Lake St. Clair.

To see how you can make a difference at home and in your community, contact the Clinton River Watershed Council and ask for the complete stormwater tip card series. Or, for more information, visit our website at www.crwc.org.

A Citizen's Guide to Boat & Auto Care

How we take care of our boats, personal watercrafts, mobile homes, cars and other vehicles greatly influences the health of the Clinton River and Lake St. Clair.

Several area marinas are doing their part to keep the water clean by participating in the Macomb County Health Department's Marina Pollution Prevention Program. (Is yours?) You can do your part to prevent pollution at the source by checking up on your marina and following a few simple tips at home.

The stormwater tip card series was funded by a grant from the Michigan Department of Environmental Quality for the Bear Creek Restoration Project.

Car washing & boat cleaning

- Look for non-toxic and phosphate-free cleansers.
- Use alternative cleaners, such as baking soda and lemon juice. Avoid those with bleach, ammonia, lye or petroleum distillates (*see chart*).

<i>Product</i>	<i>Better Alternative</i>
Bleach	Borax or hydrogen peroxide
Chrome cleaner	Apple cider vinegar to clean, baby oil to polish
Drain cleaner	Boiling water and plunger or plumber's snake
Engine cleaner	Steam clean the engine in a dedicated service area.
Fiberglass stain remover	Baking soda paste, scrub pad, "elbow grease"
Paint stripper	Physically remove old paint without chemical use. Avoid products containing methylene chloride, trichloroethylene, benzene, trichloroethane, xylene or toluene.
Scouring powders	Baking soda and "elbow grease"
Window cleaner	Vinegar and lemon juice mixed in lukewarm water
Wood polish	Olive oil or almond oil for interior wood; use water- or borax-based products.

Fuel and oil

- When fueling, avoid topping off! Remember that fuel expands as it warms up in your tank.
- Store fuel only in approved containers.
- Routinely check for and fix oil and fuel leaks.

Engine care

- Keep boat and car engines properly tuned for efficient fuel consumption and clean exhaust.
- Use a drip pan when doing engine maintenance. Drippings left on the cement get washed into nearby drains and end up in our streams.

Sewage control

- Use onshore restrooms when docked, and encourage everyone to use the facilities before casting off.
- Empty portable toilets *only* at pumpout stations or at home.
- Clean up after your pet to prevent pet waste from washing into storm drains.

Most Lake St. Clair marinas have pumpouts and allow non-members to use them. Keep sewage out of storm drains and lakes!
